STUDENT SETUP GUIDE

Get 30 days of Replit Core.

Set up your account, redeem your student code, and be ready to build before the Buildathon starts. It takes about five minutes.

PROMO CODE	ILOVEMTC	First 60 students

01 Create or log in to your Replit account

Go to **replit.com** and sign up, or log in if you already have an account.

02 Select the Replit Core plan

Open the plans page and choose **Core**.

03 Enter the promo code at checkout

Type **ILOVEMTC** in the promo code field and apply it.

04 Confirm the discount before you pay

Check that the discount shows on your order, then add your card and complete checkout. **Do not skip the check.**

BEFORE YOU CHECK OUT

A card is required. Here is how to avoid surprise charges.

30 **days of Replit Core** once you redeem the code.
After that it is a subscription and renews unless you cancel.

CARD

Credit or debit card

You need a valid card to activate Core, even with the promo code applied.

CANCEL

Cancel before renewal

Core is a subscription. If you do not want to continue after 30 days, cancel before it renews. Set a reminder on day 25.

LIMITS

Set a spending limit

In your account's usage and billing settings, set a spending limit so usage cannot run past what you expect.

USAGE

Turn off Auto Reload

Auto Reload tops up your balance automatically. Turn it off, and check your usage regularly while you build.

IMPORTANT Replit is not responsible for additional usage charges. You are in control of your plan, your limits, and your cancellation.

Ready to build

Fri, Nov 6 · 2:30 – 7:30 PM
Triton Conference Room, Triton Arena, UCSD

Bring your laptop

Log in to Replit before you arrive so we can start building right away.

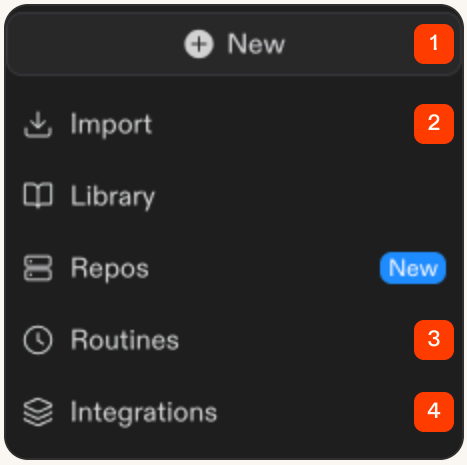

AFTER YOU'RE IN

A quick tour of Replit.

Your home screen is where everything starts. Describe what you want, and Replit's Agent builds it with you.

- **A** **Prompt box.** Describe what you want in plain English.
- **B** **Plus.** Add files and other context to your request.
- **C** **Output.** Choose what kind of thing you want to make.
- **D** **Power.** Pick Agent's mode: Free, Power or Max. Higher modes use more credits.
- **E** **Send.** Start the build. The mic next to it lets you speak your prompt.

- **1** **New.** Start a fresh project.
- **2** **Import.** Bring an existing project into Replit.
- **3** **Routines.** Schedule recurring Agent work, like hourly, daily or weekly tasks.
- **4** **Integrations.** Connect outside tools such as Stripe, Slack, Notion and Google Workspace.

Library, Repos, Security and More are there too. Explore them once your first project is running.

YOUR FIRST BUILD

01
Describe it
Say who it is for and what it should do.

02
Let Agent build
Answer any questions it asks.

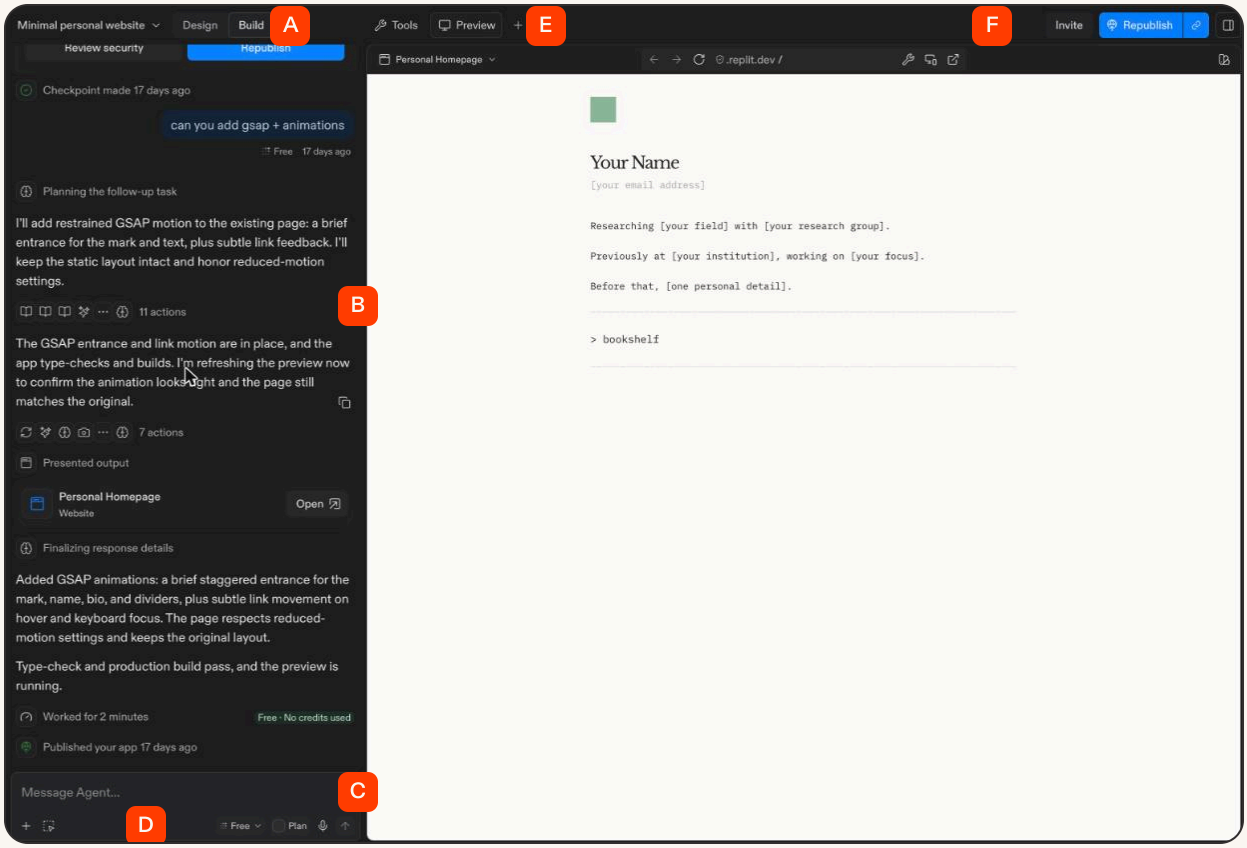

03
Test it
Click through the live preview.

04
Refine
Ask for one change at a time.

05
Publish
Share it once it works.

INSIDE A PROJECT

Where you'll spend the day.

A **Build and Design.** Build makes the app. Design explores layouts and visuals.

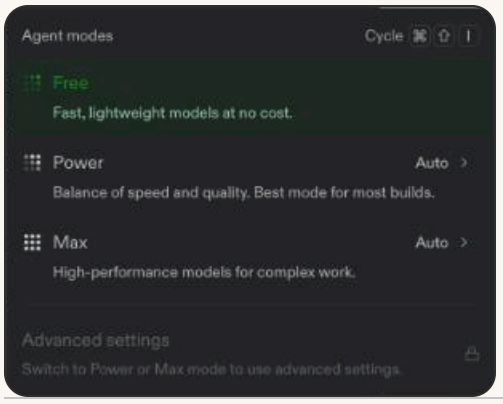

B **Agent chat.** Your conversation with Agent. It shows what it did and why.

C **Message Agent.** Ask for changes here, one request at a time.

D **Agent mode.** Choose how powerful Agent is. Details below.

E **Preview.** Your live app. Test it here after every change.

F **Publish.** Puts your app online at a link you can share.

CHOOSING AN AGENT MODE

Free. Fast, lightweight models at no cost.
Power. A balance of speed and quality. Best for most builds.
Max. High-performance models for complex work.

Higher modes use more credits. If you want to keep costs at zero, start in Free and check your usage before switching.
